**SERBATOI
TANKS**

SERBATOI

I nostri serbatoi sono studiati per adattarsi alle tantissime configurazioni dei telai di veicoli industriali. Per montaggio nel contro telaio, laterale o retro cabina la nostra gamma è particolarmente versatile per meglio agevolare l'installazione dei nostri kit idraulici sui veicoli industriali. Le versioni aggiuntive con filtrazione sulla tubazione di ritorno al serbatoio o con montaggio delle valvole distributrici direttamente sul serbatoio completano la nostra offerta, proponendo soluzioni orientate alla più ampia flessibilità ed alla semplicità di montaggio.

TANKS

Our tanks are designed for fitting to the most configurations of the industrial vehicles' chassis. Our range is very versatile for helping the installation of our hydraulic kits on the industrial vehicles, in case of underbody, side or rear mounting. The additional models with filtering on the return pipe to the tank or with mounting of the distribution valves directly on the tank, complete our proposals, offering solutions for a greater flexibility and an easier assembly.
